Subject: ALBEDO wins the E1/Wander/FRL tender in TELEFONICA

Date: July 2011
Answer to:
info.telecom@albedo.biz

ALBEDO telecom, the most innovating T&M manufacturer today announces that its AT.2048 has been declared winner of TELEFONICA's tender for 64 x E1 testers because it clearly outperformed the other solutions being considered.

Salvador Borràs, Development Director, explains: *The success of AT.2048 and the new features such as Wander measurements, Frame Relay support, or VF analysis indicate that we look forward in order to guarantee the best product to our customers always. This is why TELEFONICA chose AT.2048 which offers the most advanced technologies in a proper field solution which is both comprehensive and easy to manage.*

The AT.2048 is world's last E1 tester, designed in 2011 then electronics is very powerful and requires less power. Consequently field engineers can work many hours installing, verifying and troubleshooting E1, ISDN, POTS, Leased Lines, FRL, and Synchronization networks with the minimum effort while maximizing the efficiency of their work. ALBEDO telecom is once again identified as a major player in the market of Test and Measurement technologies for World Telecom Carriers and Operators.

About us. ALBEDO telecom is the result of over 35 years of experience in the telecom market, leading research and expertise in test, measurement, and monitoring applications. Re-founded in 2008, is recognized by vendor in the market for its managed top Quality X

We can do it for you!
